

Multiclear® BOX 2Wall HG

MULTICLEAR® BOX 2Wall HG is an exclusive extruded multiwall polycarbonate sheet specifically designed to offer excellent light transmittance with extreme stiffness allowing cost saving by using fewer glazing bars for installations.

For the veranda market we produce the sheets typically in widths of 980 and 1200 mm. We provide a 10-year limited warranty against discoloration, loss of impact strength and light transmission due to weathering.

Typical application areas are verandas, car ports, winter gardens, sidewalls etc.

As all of our transparent products, MULTICLEAR® BOX 2Wall HG has classification B-s1,d0 according to EN13501-1. This is the best obtainable classification.

As an option, the sheet is available with Solar Control (SC) properties and we have various products such as SC Transparent, SC White, SC Green and SC Grey. We can also offer "Hammer Finish" for special applications like privacy glazing.

MULTICLEAR® BOX 2Wall HG has one side UV protection as standard and UV protection on both sides is available upon request. Standard available thickness is 16 mm. Standard colours are clear, opal and bronze. Custom colours on request.
