

# MAKROTECH™ - THE ONLY LIMIT IS YOUR IMAGINATION

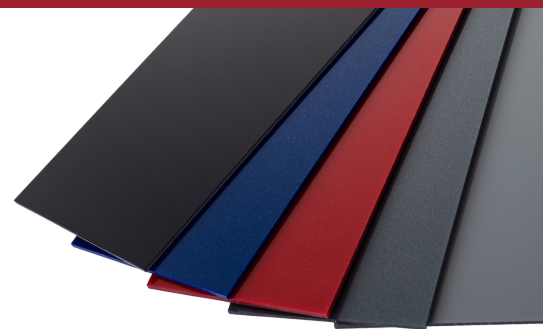

One of our "all time = all-star" products is opaque polycarbonate sheet Makrotech™. It is good for the toughest environments; it has a superior impact resistance over a wide temperature range. Our sheets also have great fire properties, the material is even self-extinguishing. Opaque PC is well suited for thermoforming, bending or machining.

## WHAT ARE TYPICAL APPLICATIONS? YOU TELL US!

Makrotech™ is your best option in all cases, where you need unbreakable solutions:

- Suitcases
- Wallcladding
- Machine covers
- Containers
- Agricultural equipment
- Automotive

and much more. The possibilities with our Makrotech sheets are almost endless. You can choose colour, grain, size and thickness. Cut-offs from your production can be used into new sheet through our total recycling concept.

We are experienced in extrusion of standard glossy colours, metallic colours as well as matt colours. Dual colours are also available via coextrusion of two different colour layers. MAKROTECH™ can be chosen with or without stripes (for camera/robot identification). Most products can be chosen with a protecting UV-layer on top.
